SHAIR ALI

Full-Stack Developer | Freelance Software Developer

Lahore, Pakistan | +92 324 6648736 | shair6470@gmail.com
github.com/shairalidev | fiverr.com/s/GPPEY20 | shairali.com

PROFESSIONAL PROFILE

Full-Stack Developer and Computer Science graduate with professional freelance experience since 2023, building and maintaining client websites, SaaS platforms, business applications, and custom web products. Experienced across frontend development, backend APIs, database design, authentication, admin dashboards, payment and email integrations, and production deployment. Comfortable owning projects end to end, from requirements and implementation through server configuration, launch, troubleshooting, and ongoing maintenance. Strong practical experience with React, Next.js, Node.js, Express, SQL/NoSQL databases, and Linux-based hosting.

CORE TECHNICAL SKILLS

Frontend:	React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, responsive UI, component-based development
Backend & APIs:	Node.js, Express.js, REST API development, authentication (JWT), server-side logic
Databases:	MongoDB, MySQL, PostgreSQL, data modelling, database integration
Integrations:	Stripe / payment workflows, Resend email, third-party APIs, WebSockets / real-time features
Cloud & Deployment:	AWS, DigitalOcean, Ubuntu VPS, Vercel, Netlify, cPanel / shared hosting
DevOps & Servers:	Nginx, PM2, DNS, SSL, environment configuration, Git, GitHub, CI/CD
Product Development:	SaaS applications, admin panels, customer portals, booking workflows, dashboards

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer **2023 – Present**

Self-Employed | Remote | Level 1 Seller on Fiverr | International clients

- Develop custom websites, web applications, and business platforms for international clients, managing work from requirement clarification and implementation to deployment and post-launch support.
- Build responsive frontends and reusable UI components with React.js and Next.js, connected to backend services and databases.
- Develop Node.js and Express.js services, REST APIs, authentication flows, database operations, and third-party integrations.
- Create administrative dashboards and customer-facing portals for managing users, records, purchases, bookings, and operational workflows.
- Integrate payment checkout workflows and transactional email services such as Resend.
- Deploy and maintain production applications on AWS, DigitalOcean, Ubuntu VPS, Vercel, Netlify, and shared hosting.
- Configure and troubleshoot Linux servers, Nginx reverse proxies, PM2 processes, DNS records, SSL certificates, and environment variables.
- Manage code and delivery with Git and GitHub, including branch management, deployment automation, debugging, performance improvements, and maintenance.
- Communicate directly with clients, provide technical guidance, estimate work, resolve production issues, and deliver iterative feature updates.

SELECTED PROJECTS

Cover Me Lien Services covermelienservices.com

Construction lien services platform | Client portal, workflow tools, membership and payments

- Developed and maintained a business platform for construction lien services, document workflows, and client interactions.
- Built portal capabilities for document uploads, request tracking, status visibility, and downloadable confirmations.
- Contributed interactive features including a deadline calculator, service information, and membership/checkout experiences.
- Supported backend, database, integration, and deployment work for the live website.

Tenant Certification Online tenantcertification.online

Certification / education platform | React, backend APIs, database, production deployment

- Developed and maintained the web application and supporting backend services.
- Managed application data and database access, API configuration, and deployment across development and live environments.
- Administered a DigitalOcean Ubuntu droplet: Nginx reverse proxy, PM2 process management, SSL/domain setup, and service health checks.
- Planned and integrated course registration and paid-access workflows involving Stripe and CustomerHub.

Rivelya — SaaS / Web Product rivelya.duckdns.org

React, Vite, Node.js, Express, MongoDB, JWT, WebRTC

- Worked across the frontend and backend of a full-stack product, from React interfaces to Node.js/Express services backed by MongoDB.
- Implemented core application workflows, user authentication, customer-facing features, and administrative functionality.
- Built real-time communication features using WebRTC and Socket.IO-style event workflows, including session-related review interactions.
- Handled email integration, environment configuration, deployment, and production troubleshooting.

ATES Barberos ates-barberos.com

Barber / appointment website | Web application development and hosting

- Built and supported a barber business web presence and appointment-related application workflows.
- Managed deployment and hosting configuration, including the BarberAppointments project environment.

Additional Client & Development Work github.com/shairalidev

Custom web applications, dashboards, integrations, and technical maintenance

- Delivered client-specific features including admin panels, customer management, authentication, purchase history, email notifications, payment flows, and API integrations.
- Provided deployment, migration, server setup, bug fixing, and ongoing support for existing web applications.
- Public code samples and selected repositories are available on GitHub.

EDUCATION

Bachelor of Science (BS) in Computer Science **2019 – 2023**

Riphah International University, Lahore Campus, Pakistan

CGPA: 3.75 / 4.00 | Degree requirements completed, June 2023

Relevant coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Web Programming, Advanced Computer Programming, Distributed Computing, Information Security, Artificial Intelligence, Blockchain Technology.
